Table XVII.2: Diplomatic table

XVII.2 Revolts tables

XVII.2.1 Summary of the procedure

A Roll 2d10 and read the revolted country in the column of the current period. The target country may be a MIN or other abstract entity in which case a pseudo-stability is provided in brackets.

A.1 Decrease this pseudo-stability of minors in the table by **–1** if:

- This is HOL* and HIS perceived the taxes at the preceding turn;
- This is POR* at the turn of event III-6 (Portuguese Disaster in Africa) or after.

B Roll 1d10+the Stability (or modified pseudo-stability) on the target country's table. Reroll in the description of groups below if needed.

C Lastly, roll 2d10 in the last column of the table below to find the strength of the revolt.

Design note: The COL revolt area is mutually exclusive with both event IV-20 (Revolts in Singala/Formose), event V-17 (Slave Revolts in the West Indies), event VI-15 (Slave Revolts in the West Indies) and event VII-11 (Revolt in Indonesia). If using the COL revolt area, consider these events as R/D. If not, reroll the revolt area whenever COL occurs.
